SUMMARY

I'm a software developer and I currently live in Istanbul.

I usually work on Spring Framework or Laravel projects. I have used Python, PHP, Bash Script and many other technologies in the past.
I also have Debian and Red Hat based linux system management skills.
I love open source and prefer to use open source tools and technologies.
My modest open source projects can be found at github.com/aemini

EDUCATION

| 2002 - 2004 | Computer Engineering |
| (Left) | Eastern Mediterranean University |

| 1999 - 2007 | Mechanical |
| | Selcuk University |

SKILLS

- Programming Languages
    - Java   Advanced
    - PHP   Advanced
    - Phython   Intermediate
    - JS, TS   Intermediate
- Frameworks
    - Spring, Spring Boot(*)   Advanced
    - Laravel   Intermediate
    - Django   Basic
- Database Management
    - PostgreSQL(*)   Advanced
    - MySQL   Advanced
    - Sqlite   Intermediate

- ○ Oracle   Basic
- ● Other
  - ○ Application Serves & Middleware (Apache, Nginx, Tomcat, WebLogic, WildFly)
  - ○ LDAP (Open LDAP, Open DS, MS Active Directory)
  - ○ Firewalls & Networking (Fortigate, Juniper, PfSense)
  - ○ Monitoring (Icinga, MRTG, Nagios, Zabbix)
  - ○ Container orchestration (Docker Swarm, LXC)

(*) I prefer to start a new project

WORK HISTORY

Mar 2019 - Present	**Software Development, Infrastucture Administrator** Ödeal Teknoloji A.Ş. (www.öde.al) I started as a software developer for the company operating on financial technologies. After the first 2 months, the position change was made because the system administrator left and I had experience in system management. In the company operating in the field of financial technologies, I am managing systems within the framework of PCI DSS and BRSA compliance. The technologies we use are mainly Java, Docker Swarm, Percona XtraDB Cluster and some monitoring tools like Ossec. Except for exceptions, we prefer to work with Centos.
Aug 2016 - Aug 2018	**Software Development** Sigma Telecom LLC (www.sigmatelecom.com) I have developed a resource management system that analyzes CDR logs and automates payments through bank services. I was recently involved in an USSD based payment system project which called 400.
Jul 2014 - Jun 2016	**Product and Service Management** Invio (www.invio.com) With Jmeter for Turkcell and Boyner, I conducted the preparation of quality control tests of web services of mobile applications. I managed an AWS-based test environment and wrote the documentation of how to set up services in production environments managed by customers.

Jun 2013 - Aug 2013	**Product and Service Management**
	Kartaca (www.kartaca.com)
	I left the job I started for Turkcell targeted message service product management as soon as the project could not get approval from BTK.
Jun 2008 - Sep 2011	**IT**
	Boyabat Electrical Power Production (www.boyabatelektrik.com.tr)
	It is my only Microsoft based work experience :). I established and managed the IT infrastructure of a hydroelectric power plant, which was started to be constructed in Boyabat district of Sinop.

HOBBIES

I want to play bass but I can not play. The same applies to other instruments :)
Sometimes (when blowed my brain) I listen air traffic controllers radio stations or "Nyan Cat 10 Hours" like videos :)
